## Basic Controls

---

### Selecting Objects and Icons

Press/grab/click objects and icons to interact with them

---

### Map Movement

HoloLens uses hand gestures for direct manipulation of holograms. For more information visit <https://learn.microsoft.com/en-us/windows/mixed-reality/design/direct-manipulation>

## Key Board

Number	Key	Description
1	W	Move camera orientation forward
2	A	Move camera orientation left
3	S	Move camera orientation backward
4	D	Move camera orientation right
5	Q	Move camera orientation down
6	E	Move camera orientation up
7	▶	Orbit left (Double tap to toggle orbit, tap to stop)
8	◀	Orbit right (Double tap to toggle orbit, tap to stop)
9	▲	Orbit up
10	▼	Orbit down
11	-	Decrease Orbit Speed (Decreasing below 1 will stop current orbit action)
12	=	Increase Orbit Speed (Max 5x)
13	Shift	Double camera orientation speed

## Mouse

---

---

### **Left Click**

Move selected object (Will move live map surface)

Double click and hold to scale object up and down. (For objects that allow scaling)

---

### **Left Click + Right Click**

Rotate selected object

---

### **Left Click + Scroll Wheel**

Live Map only - zooms map surface

---

### **Scroll Wheel**

Move Camera towards and away from map

---

### **Right click**

Rotate camera

---

## Menu

### Open/Close Menu

Click the > button in the bottom left hand corner to open the Home Menu

Click < to close the Home Menu

Click back arrow to return to previous menu or "x" to close out

### Scroll a Menu

Click the scroll bar and move up/down or side-to-side

---

## Start Up

 Ensure that status symbols in the top right corner are green

**Icon****ToolTip/Function****Internet**

Green - Successfully Connected to Internet  
Red - Could Not Connect to the Internet

**Multi-User**

Green - Multi-User Active and Connected  
Yellow - Single-User Mode Active  
Red - Multi-User Not Connected

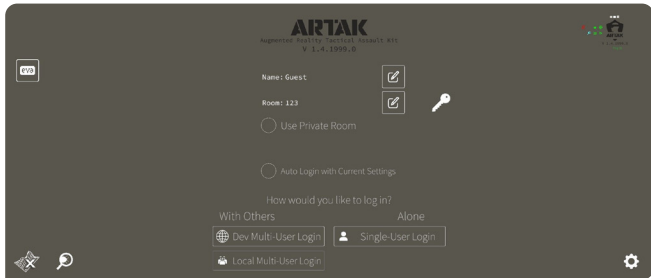

**Network**

Green - Device Connected to a Network  
Red - Device Not Connected to a Network

**Server**

Green - Successfully Connected to Server  
Red - Could Not Connect to Server

# Login Screen

-  Check the Use Room Password if you would like your room to be protected by a password
- Check Auto Login with Current Settings if you wish to bypass the Login screen next time
- How would you like to log in - Click to join a Multi-User or Single-User room

## Icon

## ToolTip/Function

### Eolian Virtual Assistant (EVA)

Click on the icon in the Login Screen to toggle EVA on/off  
EVA will walk you through syncing an anchor, becoming main presenter, opening a map, and spawning nodes

### Edit username

This is the name that will appear in the room

### Edit room name

Allow others to join using the same room name

---

**Icon****ToolTip/Function****Open partition key panel**

Setting partition keys will lock all data created in a room using keys behind those keys.

**Clear Spatial Mesh**

Clears spatial mesh data

**Open Debug Panel**

Shows a log of warnings, errors, stack trace, and full debugging  
Shows Photon Stats

**Network Settings Panel**

click to open network settings panel

# Network Setting Panel

The screenshot shows a dark-themed settings panel titled '> Network Settings'. It contains several interactive elements: a toggle for 'Offline Mode' (currently off), a toggle for 'Allow Internet' (currently on), two dropdown menus for 'Server Connection Type' and 'Multi-User Connection Type' (both set to 'Cloud'), a toggle for 'Developer Mode' (currently off), a 'Delete All App Data' button, and a 'Submit' button. In the top right corner, there are icons for a user profile, an information icon, and a refresh icon.

## Offline Mode

Operate the application independent of all networking

By toggling on you will no longer have Internet options

## Allow Internet

Will allow the app to connect to the Internet

---

## Server Connection Type

Cloud - Connects to Eolian's cloud sever. (Requires Internet)

CANN - Connects to a CANN on this device's LAN

Custom - Connects to the specified IP Address

## Single-User Mode

App will operate normally but with no Multi-User Functionality

## Multi-User Connection Type

Cloud - Connects to Internet Multi-User service running on a Cloud

CANN - Connects to the Multi-User service running on a CANN

Custom - Connects to the specified IP Address

## Refresh

Force Application to recheck current network settings

# Home Menu

 If there is no map selected, the Map Menu icon will not appear

Icon

ToolTip/Function

## Map Selection

Choose from a selection of maps

## Mission Plans

Menu for creating, loading, and deleting mission plans

## Icon

## ToolTip/Function

### **Save a Mission Plan**

Plan a mission, then press create to get to save panel

Enter a save name, then save to cloud or save to local file

### **Load a Mission Plan**

Choose from saved mission plans, then press load

### **Control Panel**

Menu for enabling and disabling other users controls

Ability to take control over the room so other users aren't able to manipulate anything.

# Home Menu

---

Icon

ToolTip/Function

## HMD Syncer

Menu for syncing this devices virtual content to the real world location

Choose between spatial anchors or image tacking

## User List

List of all users in the multi-user session as well as control over various user settings

Toggle mute users/mute all

Toggle disable all controls

## App Settings

Menu containing basic map settings

---

**Icon**

**ToolTip/Function**

**Map Menu**

Menu containing settings and controls for the current map

# Settings

Icon

ToolTip/Function

Open debug panel

Clear spatial mesh

Icon

ToolTip/Function

**Open audio settings panel**

Mute Self  
Master Volume  
SFX Volume  
AI Voice Volume  
VOIP Volume

**Recenter visual data to the virtual world center**

**Recenter the visual data in front of you**

**Exit the room and return to the login screen**

# Map Menu

Location Search and Bookmark icons will only appear in live maps

## Icon

## ToolTip/Function

### Map Manipulator

Manipulate map via UI controls

### Location Search

Enter a location to center the map over

Use Lat/Lon, MGRS, or type a location to search for a location

### Bookmark

Load and create location bookmarks

### Node History

Choose a historical time window to view live data

## Icon

## ToolTip/Function

### Map Settings

Gives you the right Lat/Lon or MGRS

Toggle contour lines, node labels, map labels, node directional

Able to lock/unlock the map

Able to lock/unlock all (nodes, routes, map)

Toggle map shape from circular to square

Adjust zoom level and map radius (shrink or enlarge map)

Able to change the Node Height

Node Stem Transparency

Toggle map shape (i.e. circle, or square)

### Point Select

Add nodes into the node queue

Top row shows everything you can ingest (ASSETS, VEHICLES, POINTS, TASKS)

Second row shows (UNKNOWN, FRIENDLY, NEUTRAL, HOSTILE)

To spawn the node in the node queue press the plus button next to current selection.

## Icon

## ToolTip/Function

### Point List

Enter a location to center the map over

Use Lat/Lon, MGRS, or type a location to search for a location

### Layer Selection

Enter a location to center the map over

### Live Nodes

Can see breadcrumbs (blue lines that show historical records of positioning)

### Analytic

ex/ NYC Subway Lines

### Overlay

ex/ population density

### Current Weather

View weather information of the current map location for a location

## Icon

## ToolTip/Function

### Minimap

Shows the area that was scanned but from a 2D image  
Zoom in and out with the pill bar on the bottom after it is opened.

### Show Lat/Lon

See the location with latitude and longitude the whole entire time on your laser pointer

### Recenter visual data

Click to recenter the current visual data to the virtual world center for a location

### X-Ray

Open a willow to clip away parts of the map. Best used for viewing interior scans for a location

### Close Map

Click to entirely close out a map including any nodes/routes for a location

# Map Manipulator

Icon

ToolTip/Function

## Mode

Switch between manipulating the placement of the map in the virtual space and manipulating the location and scale of the actual map.

## Nudge

Directional nudge

## Icon

## ToolTip/Function

**Zoom In / Zoom Out**

**Rotate**

Rotate map to the left or right

**Map Boundary Axis Selection**

**X** - Adjusts the horizontal placement of the map in the virtual space

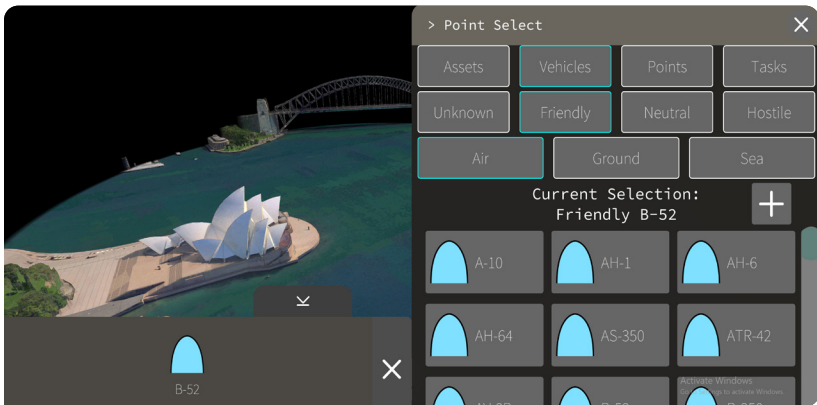

**Y** - Adjusts the vertical placement of the map in the virtual space

**Z** - Adjusts the depth of the map in the virtual space

**Zoom & Nudge Increment**

# Point Select

Click desired node (Assets, Vehicles, Points or Tasks) and then tap the plus button to add to node queue

Click asset in the queue and then place to desired location on map

## Point Select Settings

Icon

ToolTip/Function

### Target Lock

Focus and follow as if live

A green ring will appear around the node

### (Line of Site) LOS Actions

Choose between 360, 270, 180, 90, 60 FOV (Field of View)

A shaded region will appear representing what the node can see

## Icon

## ToolTip/Function

### **View Inventory**

Add guns, bombs, radios to the vehicle

Shows firing range, blast radius, and service range of inventory

### **Manipulate Altitude and Course**

Grab the green arrow to change node to desired altitude

Grab the red circle to rotate the node to desired degree

Click the blue arrow to snap node back to ground

Click red "x" to exit

### **Change Node Status**

Fully Capable (green bar)

Damaged (yellow bar)

Destroyed (red bar)

Full to Capacity (blue bar)

## Icon

## ToolTip/Function

### Lock Node

Shows the area that was scanned but from a 2D image  
Zoom in and out with the pill bar on the bottom after it is opened.

### Route Options

Unlink route points from this node  
Delete routes from this node  
Create a route from this node

### More Information

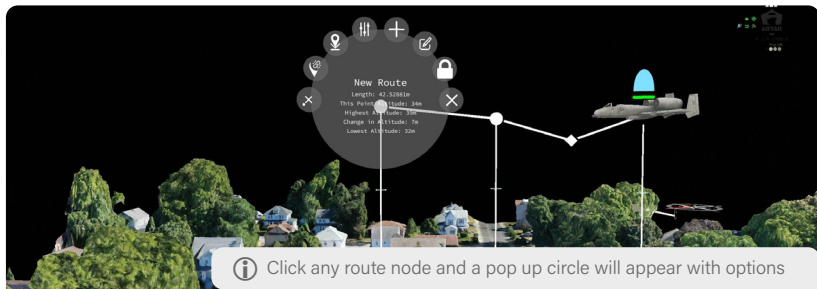

Location, Course, Personal offset, Type, COT\_  
Type, UID, Name, Status, Node Type

### Destroy Node

Clear node  
Clear routes connecting to the node

# Route Options

## Icon

## ToolTip/Function

### Destroy Point

Removes point from the route

### Detach Link Points

Choose between 360, 270, 180, 90, 60 FOV (Field of View)

A shaded region will appear representing what the node can see

### Snap point to ground

Node is pinned to the map, and cannot be moved

**Icon****ToolTip/Function****Change color**

Change the color of the route by using sliders

**Extend Route**

Add another point to the route

**Edit Route**

Label route

Basic Route - white

Infill Route - light blue

Dismount Route - blue

**Lock this route**

Lock/unlock a route into place

**Destroy this route**

Clear route from map

# Node History

> Node History ✕

Live Data Sources

Target Date:

January ▼ 1 ▼ 2023 ▼

Target Time:

16 ▼ : 00

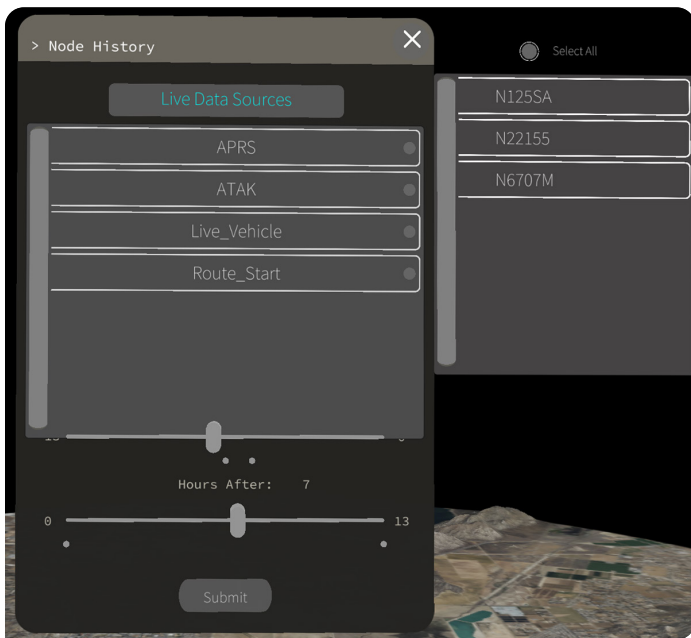

Hours Before: -13

Hours After: 13

Submit

## Live Data Source

Choose from APRS, ATAK, Live\_Vehicle, and Route\_Start  
Then choose a specific call sign

## Target Date/Time

Choose a specific date of the node desired

Enter a target time - then use sliders to up to -13 hours before target time or +13 after target time

---

## Installing ARTAK

1. Download the ARTAK\_VX.X.0.0 zip file from your desired source onto the Windows device
2. Click on the zip file once it has downloaded and extract all files
3. Open the file ARTAK\_VX.X.0.0, then click on the Windows file, then open the ARTAK Application
